Project completions

We love your business. We care deeply about the outcomes our clients are trying to achieve and support them with responsive, high-accountability delivery.

☆ WHO WE ARE

Vision, mission and values

VISION

Be the independent go-to cloud partner for customers, skilled employees, and hyperscalers.

MISSION

Enable customers through every phase of their cloud journey while creating an empowering workplace for our team.

Create customer value

Be considerate

Take action

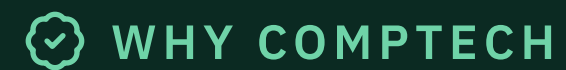

Be collaborative

Be transparent

Be curious

Work with cloud natives

CompTech combines **technical depth**, **certified expertise** and **enterprise delivery experience** to support cloud, security, platform, and modernization initiatives.

Value, not just migration

We empower enterprise clients not only to migrate into the cloud but to use it in a value-generating way.

Your cloud journey simplified

Certified expertise and practical delivery experience to design, adopt, and scale your cloud strategy with confidence.

We love your business

Responsive, high-accountability delivery focused on the outcomes you are trying to achieve.

OUR APPROACH

With you at every phase of the cloud journey

PHASE 1

Assess and plan

Understand your goals, systems and data, then agree a practical roadmap.

PHASE 2

Design

Architect secure, scalable solutions with our certified specialists.

PHASE 3

Build and migrate

Deliver the platform, migrate workloads and modernise applications.

PHASE 4

Operate and improve

Support, monitor and optimise so the value keeps growing.

Our mission: enable customers through every phase of their cloud journey while creating an empowering workplace for our team.

Move to the cloud, your way

Public cloud adoption

Begin your evolution to cloud-native today with the help of CompTech's multi-cloud certified specialists.

WHAT WE DELIVER

- Cloud readiness assessment
- Migration to AWS, Azure or Google Cloud
- Landing zones, cost and governance

On-premise cloud setup

Cloudify your data center infrastructure with our award-winning solutions on OpenStack, Azure Stack or Oracle Cloud Infrastructure.

WHAT WE DELIVER

- Private cloud design and build
- OpenStack, Azure Stack or OCI
- Integration with existing systems

Kubernetes adoption

On premise or cloud. Our seasoned DevOps engineers make the migration to container platforms smooth.

WHAT WE DELIVER

- Container platform design
- Application containerisation
- CI/CD and day-2 operations

Secure, modern and well engineered

Cloud security

Robust, end-to-end solutions to protect your assets in the ever-evolving landscape of cloud computing.

WHAT WE DELIVER

- Security assessment and hardening
- Next-generation firewalls
- Monitoring and compliance

App modernization

Address the bottlenecks of your outdated products and get the most out of your IT investment.

WHAT WE DELIVER

- Legacy application assessment
- Re-architecture for the cloud
- Automated testing and delivery

Interim engineering

Well-rounded specialists in Open Source, DevOps, Cloud Native, Mobile and Web Application.

WHAT WE DELIVER

- Skilled engineers in your team
- Open source, DevOps, cloud native
- Mobile and web development

From AI ideas to AI in production

AI strategy and use-case discovery

Identify high-value AI use cases, assess data readiness, and prioritize initiatives that align with business outcomes.

WHAT WE DELIVER

- Use-case workshops
- Data readiness assessment
- Prioritised AI roadmap

Generative AI and LLM applications

Secure internal copilots, document intelligence platforms, knowledge assistants and workflow automation on modern LLM stacks.

WHAT WE DELIVER

- Internal copilots and assistants
- Document intelligence
- Workflow automation

MLOps and AI platform engineering

From model deployment to monitoring and retraining pipelines: reliable AI platforms, ready for production.

WHAT WE DELIVER

- Model deployment pipelines
- Monitoring and retraining
- Secure, observable platforms

Strong foundations for the enterprise

Data center infrastructure

Full data centre infrastructure services according to ISO/IEC 22237 and EN 50600, as well as testing and commissioning.

WHAT WE DELIVER

- Design to ISO/IEC 22237 and EN 50600
- Compute, storage and networking
- Testing and commissioning

SAP solutions

Realize the tangible benefits of SAP solutions and drive efficiency, productivity, flexibility, and scalability.

WHAT WE DELIVER

- Implementation and migration
- Integration with your systems
- Support and optimisation

Infrastructure partners: Dell Technologies · HPE · NetApp · Pure Storage · Hitachi · Oracle · Microsoft

Domain expertise in the industries we serve

 Government

Sovereign, secure platforms for citizen services and national data.

 Banking and finance

Always-on, compliant systems for 24/7 transactions and payments.

 MFS and payments

Mobile wallet and payment platforms at scale, secured in real time.

 Telecommunications

Carrier-grade infrastructure and network operations at scale.

 Technology and SaaS

Faster time to market, streamlined deployment and autoscaling.

 Healthcare

Patient data processed at speed on secure, compliant systems.

 Travel and hospitality

Scalable systems with seamless operation and instant updates.

 Manufacturing

Safer, more sustainable operations that meet rising expectations.

 Energy

Streamlined inspections, resource monitoring and lower costs.

 TECHNICAL AFFILIATIONS

Our technology and OEM partners
